Thanks Yan
You are still working?

If you can't finish the results of the products today, I can finish the write up for them on Monday. I will finalize the write up for the rinsates tomorrow, after David updates the graph for me.

David – here is the spreadsheet that Yaorong sent me. It's a cleaner version of Yan's. Please use this to redo the graph for the rinse samples only

Thanks
Thuy

All
Attached is the latest draft of the cover memo based on what we discussed yesterday. Please review and comment
Paul
Not sure what you mean by "trend" in your suggested edits, but I hope I include your "thoughts" in limitation #3.

After I get all the comments/suggestions/edits back, I will clean it up and send it to Kimberly for her review before I make it final

Thank you
Thuy

Thuy,

Here are some of my thoughts to consider in yellow (with the exception of the footnote in yellow on page 2, not sure how/why that's there).

I expect there will also be other flags on the final spreadsheet(s) to be attached.

Obviously we will also need to remove (or edit) any preliminary results verbiage in the final report.

Paul

Paul

Can you send me the report with your comments?

Thanks

Thuy

On the checks and recoveries spreadsheet I have placed flags for CCV and outside calibration range issues.

On the report I have placed some additional comments to consider adding.

Yan, you may need to get the thumb drive to get/find the latest Sciex instrument reports to verify proper integration of the CCV data. I suspect you guys have already looked hard at the Cal Curve data, and the reportable data integrations.

Paul
